TI - BIOLOGICALLY ACTIVE ADDITION FOR COSMETIC AND CURATIVE-PROPHYLACTIC ARTICLES

AB - medicine, cosmetology. SUBSTANCE: invention proposes the composition containing sapropel extract and this composition includes product of interaction of sapropel and potassium pyrophosphate taken in the ratio 25:1. Addition shows positive effect on lipid and an aqueous-mineral metabolism in skin. Addition elicits also analgetic, anti-inflammatory and resorptive effect. Invention can be used in development of agents of curative-prophylactic action. EFFECT: enhanced effectiveness of addition, valuable medicinal properties. 2 cl, 4 ex

AB - RU2170094 NOVELTY - A composition comprises sapropel extract and product of interaction of sapropel and potassium pyrophosphate taken in the ratio 25:1, with positive effects on lipid and an aqueous-mineral metabolism in skin.

- ACTIVITY - Analgetic, antiinflammatory, dermatological.

- No biological data given.

- MECHANISM OF ACTION - None given.

- USE - In medicine or cosmetology, including the use in development of agents of curative-prophylactic action.

- ADVANTAGE - Enhanced effectiveness of addition, valuable medicinal properties.
